Infusion Therapy

## TO ALL PATIENTS AND RESPONSIBLE PARTIES:

From time to time in your care as a patient of Bay Area Neurology, CAT scans, MRI requisitions, requisitions for other laboratory studies and/or consultations by physicians or medical provider in an attempt to research and evaluate the nervous system so that an appropriate diagnosis and treatment can be rendered.

When these referrals and/or requisitions are handed to you by our staff it is then your responsibility to see to it that these studies are performed and completed. Failure to schedule and/or go through the studies that Bay Area Neurology has requested may result in a delay of diagnosis and thus, a delay in treatment and/or possible irrevocable harm to your nervous system. While at times, depending on the circumstances, the staff of Bay Area Neurology may help you in scheduling your studies all final responsibility for making appointments, taking the requisitions, and obtaining these studies lies with you.
