FX: (410) 266-2753

Clinical Consultation
Electroencephalography
Electromyography, Nerve
Conduction Studies and
Infusion Therapy

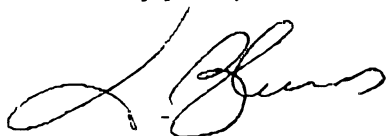

TO: All Patients

The Physicians and Staff at Bay Area Neurology make every effort to ensure that each patient scheduled to be seen by the Practice is seen in a timely manner. All the appropriate time is dedicated to patients regardless of the acuity or complexity of their illness. Some patients may require more attention to their illness. **THIS MAY INCLUDE YOU.**

Because of the acuity and complexity of patient's illnesses, more time than you would like may be spent in the lobby area waiting for the healthcare provider. Please be assured if your wait is longer than expected this will not take away from the time that will be spent with you as needed.

Your understanding and cooperation is appreciated. **THUS, PLEASE DO NOT ASK THE FRONT DESK PERSONNEL HOW LONG IT WILL BE UNTIL YOUR PROVIDER IS READY.** This slows down the process of being seen in a timely manner.

Sincerely yours,

Larry W. Blum, M.D.
Staff at Bay Area Neurology

In association with the Maryland Neurological Institute

"Offering compassionate care in the diagnosis and treatment for diseases of the spine and central nervous system."
